

COMPANY PROFILE

Milestone Innovative Technologies is a leading software development company dedicated to delivering advanced solutions and transformative digital experiences for businesses worldwide

Our Story of Milestone

Since our inception in 2009 by founder Thahir Pattannathel, we have embarked on an evolutionary journey, pioneering cutting-edge software solutions tailored to meet the ever-evolving demands of businesses. Our milestones include the launch of e-Simple, our inaugural accounting software in 2009, followed by the unveiling of the advanced iteration, ePlus, in 2014. With a portfolio boasting 100 bespoke software solutions to date, we have firmly cemented our position as trailblazers in the industry.

About Us

At Milestone Innovative Technologies, we excel in custom software, app development, IT consultancy, branding, and web design. Our diverse portfolio spans finance, e-commerce, and reflects our commitment to tailored solutions. With a skilled team, we transform ideas into digital success stories.

Our Capabilities

- Web Development: Designing web pages and apps for both internal networks and the internet.
- Software Development: Creating custom software to meet specific business needs.
- Customized Software Solutions: Tailoring software to fit exactly what the client needs.
- IT Support: Providing expert help to keep software running smoothly

Our Methodology

At Milestone Innovative Technologies, we mix style and practicality to create great results. Whether it's making websites, building software, or creating mobile apps, we carefully design solutions that go beyond the norm.

Our dedication to quality, along with our deep knowledge of technology and what users want, makes us a trusted partner in digital innovation

Discover Our Solution

ePlus ERP Solutions: A comprehensive system streamlining operations, enhancing efficiency. Tailored for modern businesses, it supports inventory, accounting, HR, production, asset, and supply chain operations.

With a user-friendly interface and robust analytics, it empowers informed decisions and operational excellence, perfect for small to mid-sized companies seeking growth and competitiveness.

Payroll: Payroll is the artful coordination of compensating employees, extending beyond paychecks. It involves gathering work hours, tax calculations, deductions,

Protasker: Protasker effortlessly tracks all project information, from tasks and deadlines to meetings and team responsibilities. With a single click, it offers immediate insights and enables swift workflow improvements.

ASTRO CAR: Used car management optimizes operations and targets business goals. A PHP-based project streamlines buying and selling, offering a trustworthy platform for users to transact on their terms.

Project Management: The proposed project management system aims to revolutionize our approach to planning, execution, and monitoring. It addresses current challenges by introducing a robust, user-friendly platform to streamline workflows and enhance project success.

Ultima: Transport management projects in PHP aim to provide a better and more reliable platform for users to access complete information according to their preferences and terms, leveraging the power of the internet and computer systems.

Technological Proficiency

Milestone Innovative Technologies has a ton of experience making strong software using all kinds of cool tech. We're really good at PHP, Laravel, React.js, MySQL, and PostgreSQL. We've nailed lots of projects in different areas, giving top-notch performance, scalability, and security to meet our clients' needs

- **PHP and Laravel:** We've mastered PHP and Laravel for building complex web applications, seamlessly integrating custom backend logic with diverse data sources. From high-traffic sites to intricate content management systems, our projects showcase expertise in Laravel's elegant syntax, robust features, and scalability.
- **React.js:** Your front-end team excels in React.js, crafting dynamic, responsive interfaces to enhance user experience across various projects. They've adeptly utilized React.js for real-time data updates and intricate state management in ecommerce platforms, interactive forums, and live data dashboards.
- **MySQL and PostgreSQL:** With extensive expertise in MySQL and PostgreSQL, we've developed robust solutions tailored for demanding data management needs. Our database solutions excel in reliability, performance tuning, and data integrity, supporting complex queries, large-scale migrations, and transactional systems.
- **Software Development Methodology:** You adhere to Agile - Scrum in all your software development projects. This approach enables you to be highly responsive to client needs and changing requirements by organizing work into sprints and maintaining regular communication with stakeholders through scrum meetings. This methodology enhances project management efficiency, increases transparency, and boosts client satisfaction.

These technical capabilities are enhanced by our effective project management and delivery methods, ensuring timely, budget-friendly, and high-quality outcomes. Tailored solutions surpass client expectations. This combination of technical expertise and methodical project execution makes Milestone Innovative Technologies an ideal partner for projects requiring high-level technical acumen and reliable project delivery

Meet Our Team , Our Superpower Squad

At Milestone Innovative Technologies, our 14 dedicated professionals form the cornerstone of our success. Each member brings unique strengths and specialized skills to our collaborative environment. Our team includes:

Software Developers

Our developers are highly skilled in PHP, Laravel, React.js, MySQL, and PostgreSQL. They're adept at crafting scalable, secure, and innovative software solutions. Many of them have advanced degrees in computer science and relevant certifications

Project Managers

Our Agile-certified project managers seamlessly guide complex projects from start to finish. They excel in risk management, stakeholder communication, and agile practices, ensuring projects stay on time and within budget.

Software Developers

Project Managers

Our Agile-certified project managers seamlessly guide complex projects from start to finish. They excel in risk management, stakeholder communication, and agile practices, ensuring projects stay on time and within budget.

UI/UX Designers

Our designers craft intuitive interfaces that enhance user interaction. Proficient in cutting-edge design software, they follow user-centered design best practices. This ensures our applications are both functional and aesthetically pleasing.

Quality Assurance Specialists

Our QA specialists play a crucial role in our development process, ensuring thorough testing of all software. They excel in both manual and automated testing, utilizing advanced tools to ensure bug-free software that meets the highest quality standards.

Support and Maintenance Staff

Your support team conducts ongoing monitoring and maintenance post-deployment to ensure top performance and swift issue resolution, fostering high client satisfaction and supporting long-term success.

Collaborative Dynamics

Our team thrives on open communication, mutual respect, and continuous learning. We prioritize regular training sessions and workshops to stay updated on the latest technological advancements and industry best practices. Our team is dedicated to delivering innovative solutions that transform businesses, embodying our commitment to excellence. This ensures we're more than just service providers; we're trusted partners to our clients.

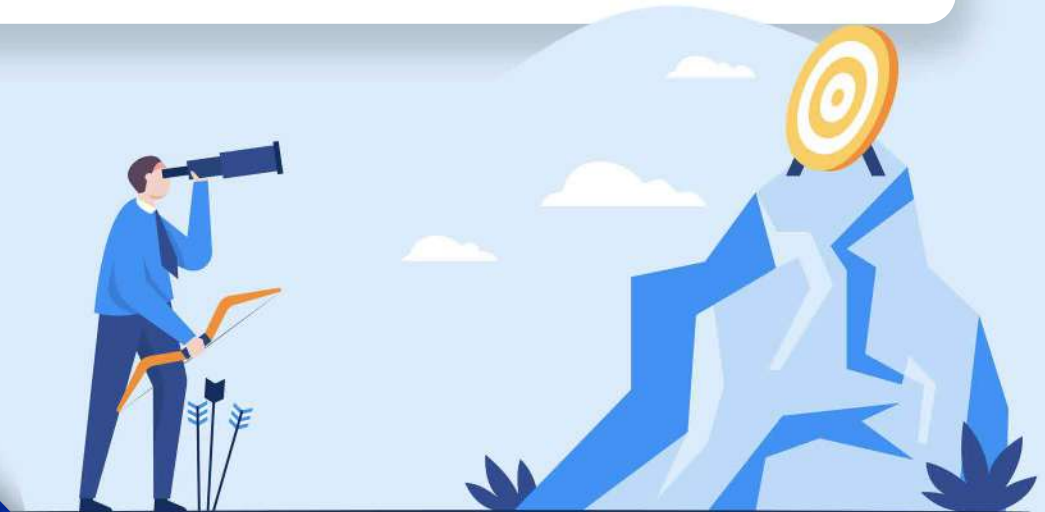

Our mission

Our mission is to help customers achieve their business objectives by providing value-added services through proper study, development, and execution of instinctive and innovative software. We hard work to delight customers through quality performance and innovation, applying software and technical wisdom for a phenomenal business experience.

Our vision

Our vision is to use technology with maximum ease and effectiveness in every aspect of life. Our efforts are to transform a business into a trendsetting, global one through a Cordial relationship, Connectivity, Responsiveness, Competence, and Customer-centric approach to maximize the output.
